### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 drawn to a mobile cart having an adjustable handle, classified in class 280, subclass 47.371.
- II. Claims 11-16, drawn to cart having a driver, classified in class 280, subclass 47.
- III. Claims 18-26, drawn to a patient treating apparatus, classified in class 312, subclass 209.
- IV. Claims 27-33, drawn to a cart including a port, classified in class 280, subclass 47.34.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions such as a cart having an adjustable handle pivotal between a stored and extended position and a cart having a driver coupled to a pivotal leg and maintaining for maintaining in a first position.

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions such as a cart having a

Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions such as a cart a cart having an adjustable handle pivotal between a stored and extended position and a cart having a support movably coupled to the cart between an elevated and lowered position.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions having different functions such as a cart having an adjustable handle pivotal between a stored and extended position and a patient treating apparatus having a power column with an arm pivotally mounting an upper section to a room.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions having different functions such as a cart having a driver coupled to a pivotal leg and maintaining for maintaining in a first position and a

patient treating apparatus having a power column with an arm pivotally mounting an upper section to a room.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions having different functions such as a patient treating apparatus having a power column with an arm pivotally mounting an upper section to a room and a cart having a support movably coupled to the cart between an elevated and lowered position.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Dilip Kulkarni on 5/31/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
